NIGHT FLIGHT CONCEPTS RELEASES FREE NVG ORIENTATION KIT TO HELP KICK-START NVIS PROGRAM PLANNING

ORLANDO, FL (March 6, 2011) — At HELI-EXPO 2011, Night Flight Concepts, a leading provider of comprehensive night vision goggle solutions, unveiled a Night Vision Goggle (NVG) Orientation Kit to introduce the basics of NVG operations. This complimentary webinar series will help organizations accelerate learning of NVG solutions and development time for night vision (NVIS) program planning.

As Night Flight Concepts President, Adam Aldous explained, “Over the years, our company has assisted countless civil and military clients worldwide with NVG solutions. In doing so, we’ve learned that many organizations find it difficult to navigate through all of the information and regulations involved to understand what is required to develop, implement and sustain an NVG solution. We created this series to help talk any organization through the first steps of this process, to kick-start their NVIS planning process.”

The **NVG Orientation Kit**, is a 5-part webinar mini-series from Night Flight Concepts that provides an introduction to the basics of what’s required for Night Vision Goggle operations. From regulations to routines, the series highlights what you need to know to ensure optimal NVG operational performance and safety. Content is delivered in short, easy to follow webinar segments which introduce different critical components of a Night Vision Imaging System (NVIS) Program:

- NVIS Program Planning
- ITAR & Regulations
- Equipment
- Training

If you already have an existing NVG program, or if you are just thinking of rolling out such an initiative, these short sessions contain many helpful tips and recommendations to ensure your NVIS program stays on track. Information covered includes:

- Integrating NVGs into your operation to enhance safety during night flight operations.
- Maintaining an ITAR compliant NVG program.
- Acquiring the correct NVG equipment to meet the applicable regulatory guidance.
- Training products and services to support all of your NVG training needs.
- Maintenance requirements for the continued airworthiness for NVGs and NVIS modified aircraft.
